<b>Description of Activity</b>	<p>Cancer Awareness Talk and Cancer Screening Camp was conducted by computer science and engineering Department of faculty of Engineering and Technology , Cancer awareness is the key to early detection and better health-seeking behaviour. Cancer is quite common in both developing as well as developed countries, but awareness is yet poor among the general population. Poor awareness may lead to poor uptake of screening modalities and delay in diagnosis. One factor that has been consistently shown to be associated with late diagnosis and treatment is a delay in seeking help for cancer-like symptoms. This paper reviews the literature on cancer awareness among the general population and attitude towards screening modalities. The poor awareness level among the Indian population shows the need for health education and sensitisation regarding cancer and its different aspects. This will be helpful in the successful implementation of health programmes related to cancer.</p>
