## **Report of seminar on Problem solving and ideation**

The Department of computer science and engineering , Faculty of engineering and technology(exclusively for women), Sharnbasva university, kalaburagi , organised a seminar on “Problem Solving and Ideation” on 24th February, 2022 at 11:00am. The seminar was inaugurated by our belloved Vice-chancellor, Register, Pro-vice chancellor and Dean and resource person Dr. Prema T.Akkasaligar . It has been started with enlightening the lamp followed by felicitation of the dignitaries on the dias. The gathering was addressed by the vice chancellor.

The seminar commenced with the resource person’s discourse on the basic problem solving and ideation skills that should be mastered by every individual so as to stand up to their problems and face them with confidence instead of giving up and running away from them

She gave an outline on the process of problem solving and the steps included while approaching a problem so as to find an effective and feasible solution. It was a very lively and interactive session wherein the resource person encouraged the participants to suggest their ideas and opinions on various matters related to problem solving.

She started off the seminar by asking the participants to come up with the names of various brands to which they can identify themselves with.

The participants came up with diverse and interesting answers. The question facilitated the participants to look into themselves and recognise their hidden talents or qualities thereby making them realise that each and every individual is unique. She quoted examples from well-known folk tales to convey the process of to problem solving to the participants and emphasised on the need and significance of acquiring such skills.

The resource person remarked on ideation and its relationship with problem solving skills, that is, how the huge process of developing and conveying prescriptive ideas helps an individual to come up with the best and the most practical solution for a particular problem as ideation generates a large number of ideas that can be filtered and cut down to the most effective one.

She highlighted the various methods used in the process of ideation like internal venturing, prototyping, developing a storyboard etc. She emphasized the fact that the process should involve ideally focused people and an effective conversation with worthy questions. The one hour seminar was very enriching and informative as it was focused on different aspects of problem solving skills and its correlation with ideation techniques.

The objective of the webinar was to impart basic acquaintance on day to day problem solving situations with the help of present trends in ideation procedures among the participants who are the budding aspirants in the present scenario.

This objective was copiously justified by the resource person thereby making the seminar a grand success. The seminar concluded with a vote of thanks.

**Feedback :** The participants gave a good feedback about the session and found it very helpful and relevant in order to inculcating idea generation. They opined that they need such kind of sessions for the enhancement of innovative ideas among them.
